MIRASYS

2021

DVMS V8

With over 20 years in business, and over 1,000,000 cameras managed, Mirasys has been a consistent force in the video surveillance industry. The core competency has always been Video Management Software. Due to the maturity of the company, and an undeviated focus on software development, our products have become more reliable, innovative, powerful, scalable, and easier to use than ever before.
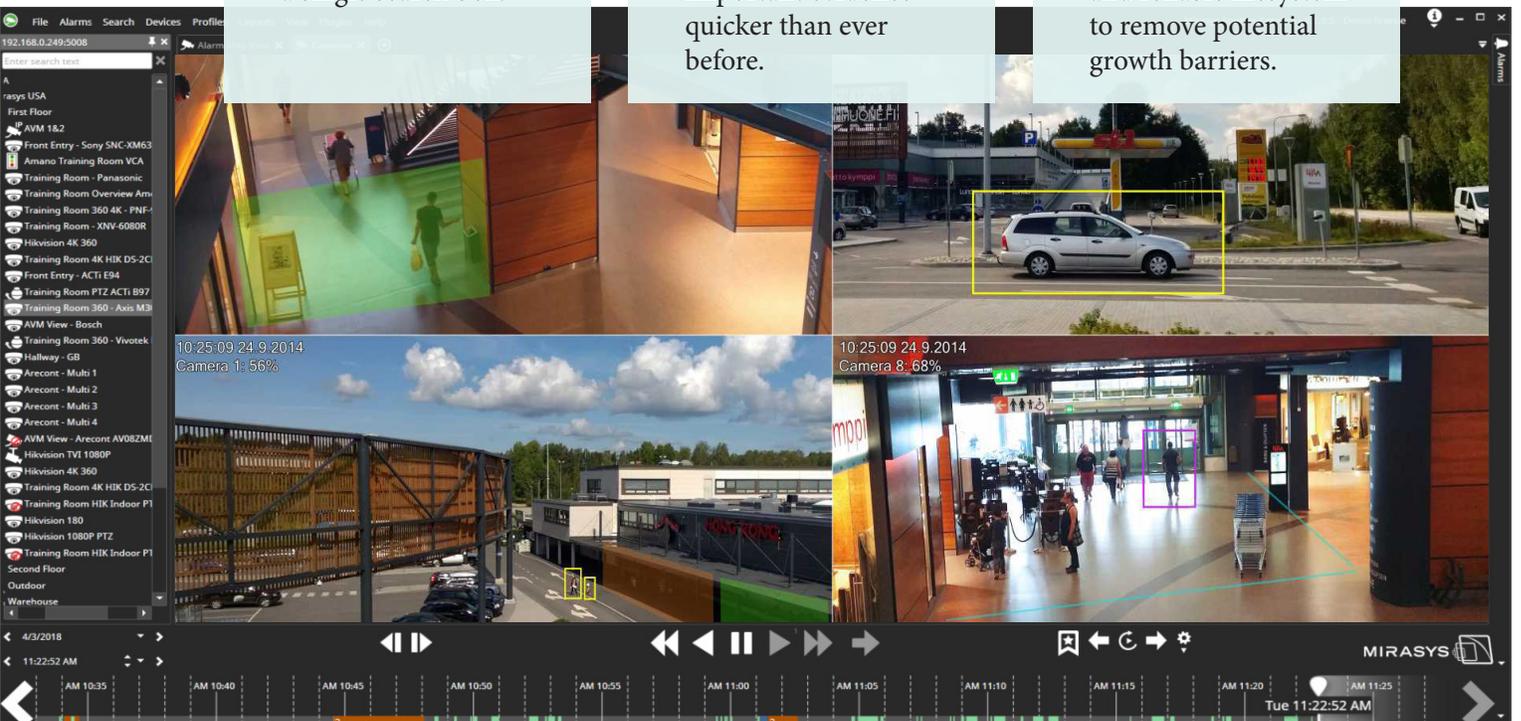

Unified Device Tree

Simplification was at the heart of the new and improved Spotter client. All Cameras, devices, saved layouts, saved tabs, saved book marks, and plugins are all searchable right from a single search box.

Customizable Activity Bar

What matters most to you? Do you want to see all recorded data in your timeline? Maybe only specific important/critical alarms and nothing else? This makes quick access to important evidence quicker than ever before.

Limiteless File System

Camera resolutions are increasing on a daily basis. With Mirasys open architecture and no limitation on resolution or frame rate we took the opportunity to improve our already robust and reliable filesystem to remove potential growth barriers.

EASY

From sales and setup, to training; the software is designed to simplify the processes of those selling, installing, supporting, and using the system. Powerful new tools available now and coming further empower the installer, manager, and user to effectively use the system.

OPEN

Over 2400 documented IP cameras supported; Mirasys takes a "Native" approach to IP camera integrations. We support client side Dewarping for 360 degree cameras from all major manufacturers. Our Access Control integrations include: Lenel, ICT, Salto, Paxton, Axis, ISONAS, ZK Access, Amano McGann, and more
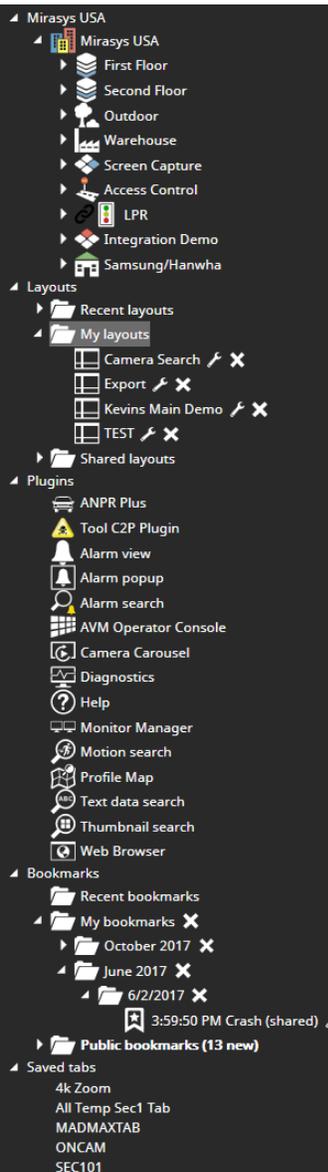

SECURE

In a world where we are all connected; security is paramount. Being a Microsoft certified partner Mirasys realizes that cyber security must be at the heart of all development. With every release we work to make every connection to the system more secure.

SOFTWARE OVERVIEW

- 360 Dewarping
- VCA
- Digital I/O Management
- Two-Way Audio
- Agile Virtual Matrix
- Failover
- Storyboarding
- Motion Search
- iHDSO
- LPR
- Access Control Plugin
- Joystick and Device Numbering

Simplicity is the ultimate sophistication

Client Software
Spotter

Powerful yet simple V8 Spotter embraces efficiency and enhances the users daily operations. For the most basic user with very limited capabilities to the most advanced operator in more complex environments Spotter provides capability and limitations where needed. With the new arrival of our Unified Integration Plugin it provides a single source for numerous integrations with the same experience using different technologies like POS, LPR, Facial Recognition, etc.

A user interface is like a joke. If you have to explain it, it's not that good.

Activity Maps

A perfect visual record to quickly identify hot spots, dead areas and bottlenecks. Each color represents areas of traffic and how often motion is detected.

Reporting

Create reports, charts and diagrams to fit the needs of your environment. These reports are easy to read while delivering the necessary information.

Agile Virtual Matrix

The perfect solution for projects that require real-time monitoring of an enterprise system. This feature allows a single or multiple operators (with rights) to take control of literally hundreds of monitors and thousands of cameras from a single operator workstation.
