

PRODUCT NEWS RELEASE

PTZFusion Lite –13

Pan-Tilt Platform

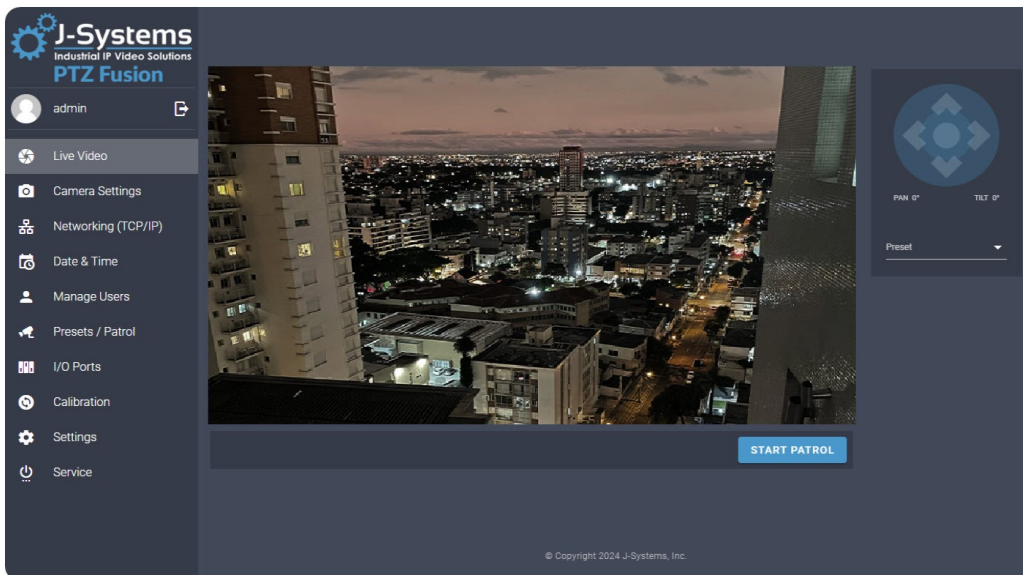

630-627-3458 <https://J-Systems.com>

Industrial grade ONVIF Profile S conformant Pan-Tilt Platform turns ONVIF fixed camera into an ONVIF Profile S conformant pan-tilt camera system. The only device visible and discoverable will be the camera, which now features native pan and tilt capabilities through the VMS software.

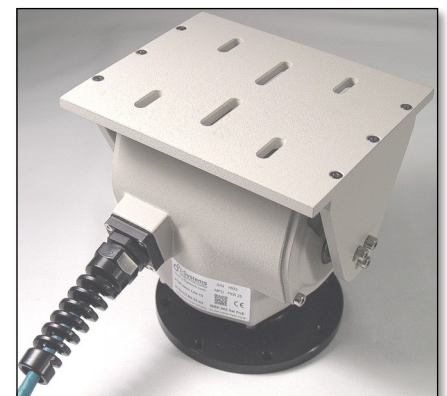

This blend between a fixed camera and a rugged Pan-Tilt positioner allows standard, as well as specialty cameras (Thermal, SWIR, LWIR and Starlight) to achieve full pan and tilt capabilities through a VMS. This advanced solution is IP based, PoE+ powered, does not require any software, serial converters, or a dedicated computer.

The PTZFusion Lite - 13 operates from –30 to +60C, is designed for rugged environments and can be controlled from any web browser. Variable speed motion control is offered via a built-in virtual joystick. Live video from an attached ONVIF IP camera is displayed in a unified interface for easy setup and operation. The PTZ Fusion platform is completely transparent to the VMS software.

- ONVIF Profile S Conformant
- Entirely IP Based, PoE + Powered
- Rugged Operation –22 to +140F (-30 to +60C)
- Camera Brand and Model Independent
- REST API Available
- Designed, Built and Supported in USA
